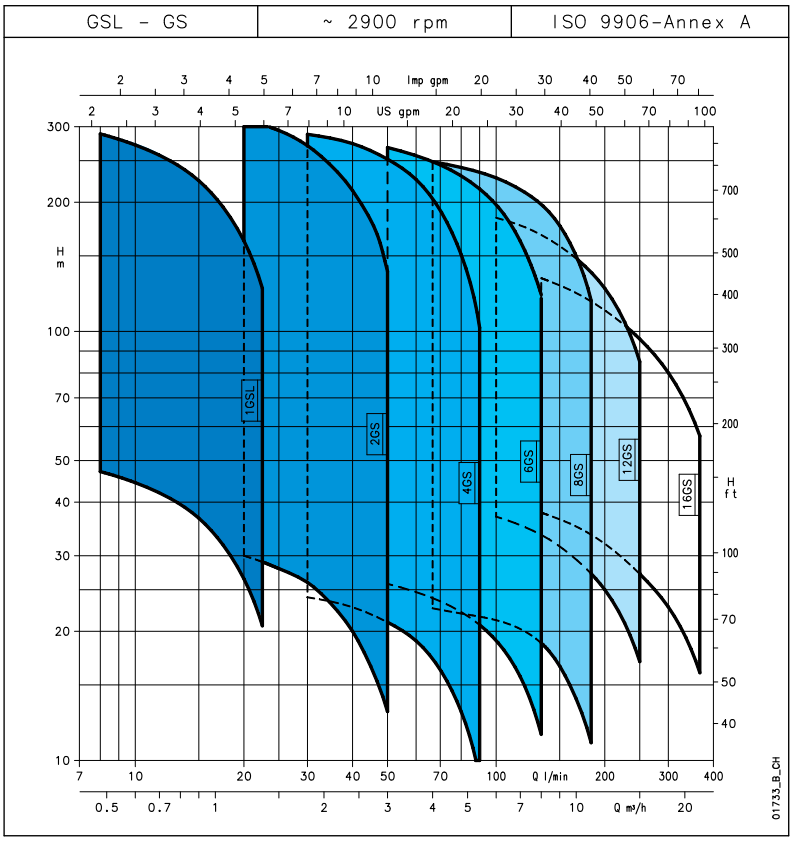
Borehole pumps for 4″ wells.

- Compact
- Robust
- Abrasion resistant
- All components are F.D.A. compatible

50 Hz version: Delivery up to 21 m³/h - Head up to 340 m.
60 Hz version: Delivery up to 27 m³/h - Head up to 300 m.

Abrasion resistant construction: the front wear plate combined with the polycarbonate floating impellers ensure optimum resistance to wear (maximum permissible quantity of sand 150 g/m³). The stainless steel structure of the pump ensures high resistance to corrosion, robustness and long-lasting performance. All the pumps can be coupled to 4″ motors NEMA Std.

Characteristic curves of 50 Hz GS Series.



Applications.

- Water supply
- Irrigation systems
- Pressure boosting
- Fire-fighting
- Fountains
